

Re: Application for the position of [JOB TITLE]

Dear Hiring Manager,

I am writing to express my keen interest in the [JOB TITLE] position at [COMPANY]. With **over 20 years of experience** in embedded software development, I am confident that my skills and background align closely with the requirements of this role.

I specialize in **firmware, middleware and application layer development** — bare metal, RTOS-based (FreeRTOS, VxWorks) or Embedded Linux — building drivers and communication stacks (CAN, BLE, USB, TCP/IP) on ARM Cortex, STM32, Microchip and NXP architectures, within environments subject to stringent quality and certification requirements.

My career has taken me through demanding and diverse industries: **aerospace** at Safran and Thales (DO-178C compliance), **medical devices** at GE Healthcare and PK Vitality (IEC 62304), **IoT cybersecurity** at Enedis (Linky smart meter audits and pentesting), and most recently **electric vehicle charging** at E2-CAD (ISO 15118, OCPP). At Cartadis, 8 years gave me a solid foundation in full-stack embedded development, from drivers to USB/TCP/IP stacks and DES/RC4 encryption. My code complies with MISRA C standards and my deliverables meet V-model traceability requirements.

What attracts me to [COMPANY] is [reason: e.g. your commitment to embedded innovation / the critical nature of your projects / the stimulating technical environment]. I am convinced that my experience in [relevant domain: e.g. avionics systems / embedded medical devices / smart charging] would bring significant value to your team.

Alongside my professional career, I founded **Workshop-DIY**, an educational robotics association where I lead workshops for young people on Arduino, ESP32, AI and 3D printing, reflecting my passion for knowledge sharing and innovation.

Available [immediately / from DD/MM/YYYY], based in the Paris area with full national mobility, I would welcome the opportunity to discuss how my experience and expertise could contribute to your projects in greater detail.

Thank you for considering my application. I look forward to hearing from you.
